Bitam Signs OEM Agreement With TSI To Create Dashboards for Managing Storage Networks

Secure Storage and Virtualization Solutions Bring High-Availability to Enterprise Data Center

Atlanta, GA – April 15, 2008 - Bitam, a Software 500 Company and global provider of Enterprise Performance Management (EPM) solutions, including Business Intelligence (BI), Financial Planning, and Strategic Planning, today announced it has entered into an original equipment manufacturer (OEM) agreement with Tributary Systems Inc. (TSI), a global leader in providing secure storage and virtualization solutions for the high availability (fault-tolerant) HP NonStop™ and other enterprise computing platforms. Under the terms of the agreement, TSI will integrate Bitam's business intelligence solution into their Virtual Integrated Tape and Library Solution ViTAL, an integrated tape virtualization solution, specifically designed for HP NonStop™ customers. The integrated solution will not only allow storage network managers to view backup and recovery operations with real-time analytical dashboards but also manage their entire IT environment with a business intelligence tool specifically designed for their environment.

"Managing storage has never been more complex and it is critical for daily operations and business strategy," said Shawn Sabanayagam, President and CEO of Tributary Systems, Inc. "TSI selected Bitam as its Enterprise Performance Management partner because of its high quality, low cost, feature rich software."

"Our partnership with TSI enables us to offer customers a high-performance, high quality visualization solution integrated with our BI solutions for an end-to-end view of the client's storage environment and all its elements," said David Abdo, CEO of Bitam.

Clients will have a single view of their storage and IT environment on a dashboard screen, allowing them to graphically see data transfer rates, CPU usage, fault and error monitoring, total enterprise data backup and restore performance, infrastructure capacity utilization for both charge-back and future capacity planning as well as other key metrics enabling storage and IT managers to manage their entire storage and datacenter operations. Storage dashboards simplify storage administration, enable future growth analysis, minimize service interruptions, lower cost of operations, and reduce the amount of time it takes to perform many storage network operations.

About Bitam

Bitam is a global provider of Enterprise Performance Management (EPM) software solutions for Business Intelligence (BI), Financial Planning, and Strategic Planning. EPM software powers the metrics that enable performance reporting, governance, and accountability that help businesses analyze, plan, and manage their business operations to meet business-critical goals. Bitam solutions are known for their rapid deployment, a high rate of adoption by users, low implementation risk, lower costs, ease of use, minimal training requirements, and wide acceptance by the international operations of companies of all sizes. Bitam, founded in 2000, is

headquartered in Roswell, Ga., and has presence in more than 18 countries in North America, Latin America and Europe. Bitam has served more than 1000 customers including Pfizer, Coca-Cola, Home Depot, Johnson Controls, Pemex, GNC, Black & Decker, Janssen and government clients, through direct sales or our extensive partner network.
